Computer Science Student | Cloud Engineering • Cybersecurity • Data Systems

Education

Bridgewater State University, Bridgewater, Massachusetts

Bachelor of Science in Computer Science, Statistics Minor

Expected December 2027

Dean's List: Fall 2025, Spring 2026

Bachelor of Arts in Communication and Media Studies

May 2024

Summa Cum Laude | Dean's List (2022–2023)

Technical Skills

Languages: Python, Java, SQL

Software & Development: OOP, DSA, Git, REST APIs, Event-Driven Architecture, Streamlit

Systems & Security: Distributed Systems, Systems Integration, MQTT, TLS

Data: Data Cleaning, Data Transformation, ETL, Data Pipelines, Relational Databases, SQLite, Chart.js

Projects

IoT Security Engineering Extern (*Python, MQTT, TLS, Streamlit*)

- Designed and developed a real-time Python data pipeline simulating distributed IoT systems using MQTT and event-driven architecture.
- Implemented and tested secure communication using TLS and certificate-based authentication to protect data exchanged between system components.
- Built a Streamlit monitoring dashboard to visualize system performance, monitor device health, and detect security-related anomalies.

Breaking Games Data Analytics & Database Extern (*SQLite, SQL, HTML, Chart.js*)

- Integrated six disconnected e-commerce data sources into a unified SQLite database, developing cleaned views to improve data quality and filter invalid traffic.
- Developed SQL-based marketing attribution across 400+ referral sources, connecting advertising spend to revenue to identify trends and generate business insights.
- Built an interactive HTML and Chart.js dashboard to monitor product priorities, marketing allocation, and business performance.

NASCAR Sponsorship Visibility Analysis Extern (*Python, Web Scraping, APIs*)

- Built a Python data pipeline to collect and process race and sponsorship data from multiple APIs and web sources.
 - Developed a weighted scoring system combining performance, media, and engagement metrics to analyze sponsorship visibility.
 - Analyzed multi-source datasets to identify trends and generate data-driven recommendations.
-

Work Experience

Randstad USA, North Attleboro, Massachusetts

March 2025 - September 2025

Temporary Operations Support

- Managed large-scale data operations across Salesforce and Excel systems.
- Identified and resolved data discrepancies to ensure accuracy and consistency across thousands of records.
